

Looking After Your Neighbourhood

These activities encourage pupils to think about where they live and what can affect their local environment. Pupils could then go and survey their local area looking at environmental pollution or investigate ways in which their homes are eco friendly.

The Resource Pack contains two main activities:

- Action and Impact
- Good Eco Choices

Teachers Notes (this document) and a [worksheet pack](#).

Curriculum Links:

- PSHE: Living in the wider world. Citizenship and global issues.

Learning Outcome:

I will develop my knowledge in relation to where I live and be able to discuss what it means to look after my neighbourhood and local environment.

Action and Impacts Activity

Use the '[LAYN Action and Impact](#)' presentation to encourage pupils to identify negative actions some residents might make and how these could affect homes and the local environment and neighbourhood.

Pupils can record their discussion on the [worksheets](#) (differentiated) provided.

Pupils to identify other actions that are poor choices which make neighbourhoods worse places to live and that don't look after the environment.

Good Eco Choices

Use the '[LAYN Good Eco Choice](#)' presentation to help pupils identify choices we can make to look after our local and wider environment.

Pupils can record their discussion on the [worksheets](#) (differentiated) provided.

Pupils to identify actions that they see already in their homes and neighbourhoods and identify actions to make are 'good practice' to help make neighbourhoods better places to live and that look after the environment.

Extension Work and Activities

Encourage pupils to survey their own local area and identify ways in which it can be made better or ways in which it is already a good place to live.

Pupil's could write to a campaign to their local Councillors about how the area could be improved or design posters that could be put up.

Pupils can also investigate how 'eco' friendly their home is and investigate ways to improve their own family's eco choices.
