

# Material Hunt

Did you know?

We can find everyday materials all over our homes.

1. Print out the material name cards.
2. Search around your house for different things.
3. Match the material name card to what you find.
4. Take a picture of each object you find with its name card.
5. Make a photo collage.

Can you work out which of the things you find that:

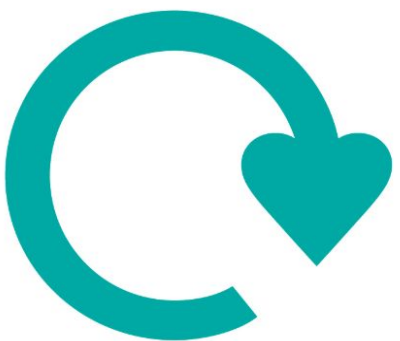

- You can put in your recycle bin?
- You can take to the household waste recycling centre?
- You can donate to a charity shop?
