

Rustle and Shelley

Did You Know? A plastic bag is used, on average, for 15 minutes and 10% of them will end up in our oceans where they can harm our sea life.

Why not listen to the story of Rustle and Shelley and then design your own reusable bag with this activity.

Curriculum Links for this activity:

Art & Design.

PHSE: Preparing to play an active role as citizens.

Geography: environmental change and sustainable development.

Learning Outcome.

I will understand that the choices we make about the things we use and throw away can sometimes hurt our environment. I will design a reusable bag.

Instructions

Have the children watch and listen to the story of Rustle and Shelley (it's just over 6 minutes). Click on image or this link:

<https://youtu.be/WHfaXbrcf4Y>

Discuss the problems of plastics in our environment and identify some of the single use plastics used everyday. Have the children think and come up with a list of things they could possibly not use or reduce, and things that they could swap out with reusable items e.g. plastic straws swapped for reusable straws.

The children can then design their own reusable bag using the template overleaf.

Can you design
a bag we can
use again and
again?
