

Go Green for Halloween

Laughing Lanterns

What You Will Need:

An empty and clean plastic milk bottle
Scissors

Poster Paint (orange, green or black)
PVA Glue (a little mixed with the paint helps it stick to the plastic bottle)

Googly Eyes or buttons
Black paper or material
Battery operated tea light

*Paint and PVA Glue can mark clothes.
Use scissors with caution.*

What To Do:

1. Using scissors, pinch the back of the bottle and cut a hole – big enough for the tea-light to go through. (An adult might want to do this for you!)
2. Choose the colour you are going to paint your lantern, paint it and leave to dry.
3. While your bottle is drying, cut out from the black paper or material a scary face.
4. Stick on your scary face once your bottle is dry and put your tealight into the bottle through the hole you cut out.
5. Display your Laughing Lantern in your window and scare away!
