

Plastic bottle

You enjoy a nice cold
drink of water or
something similar.

Plastic bottle

You put your empty plastic bottle into the plastic recycling box.

Plastic bottle

The special recycling lorries collect the plastic bottles.

Plastic bottle

All the plastic goes
through a special
sorting machine.

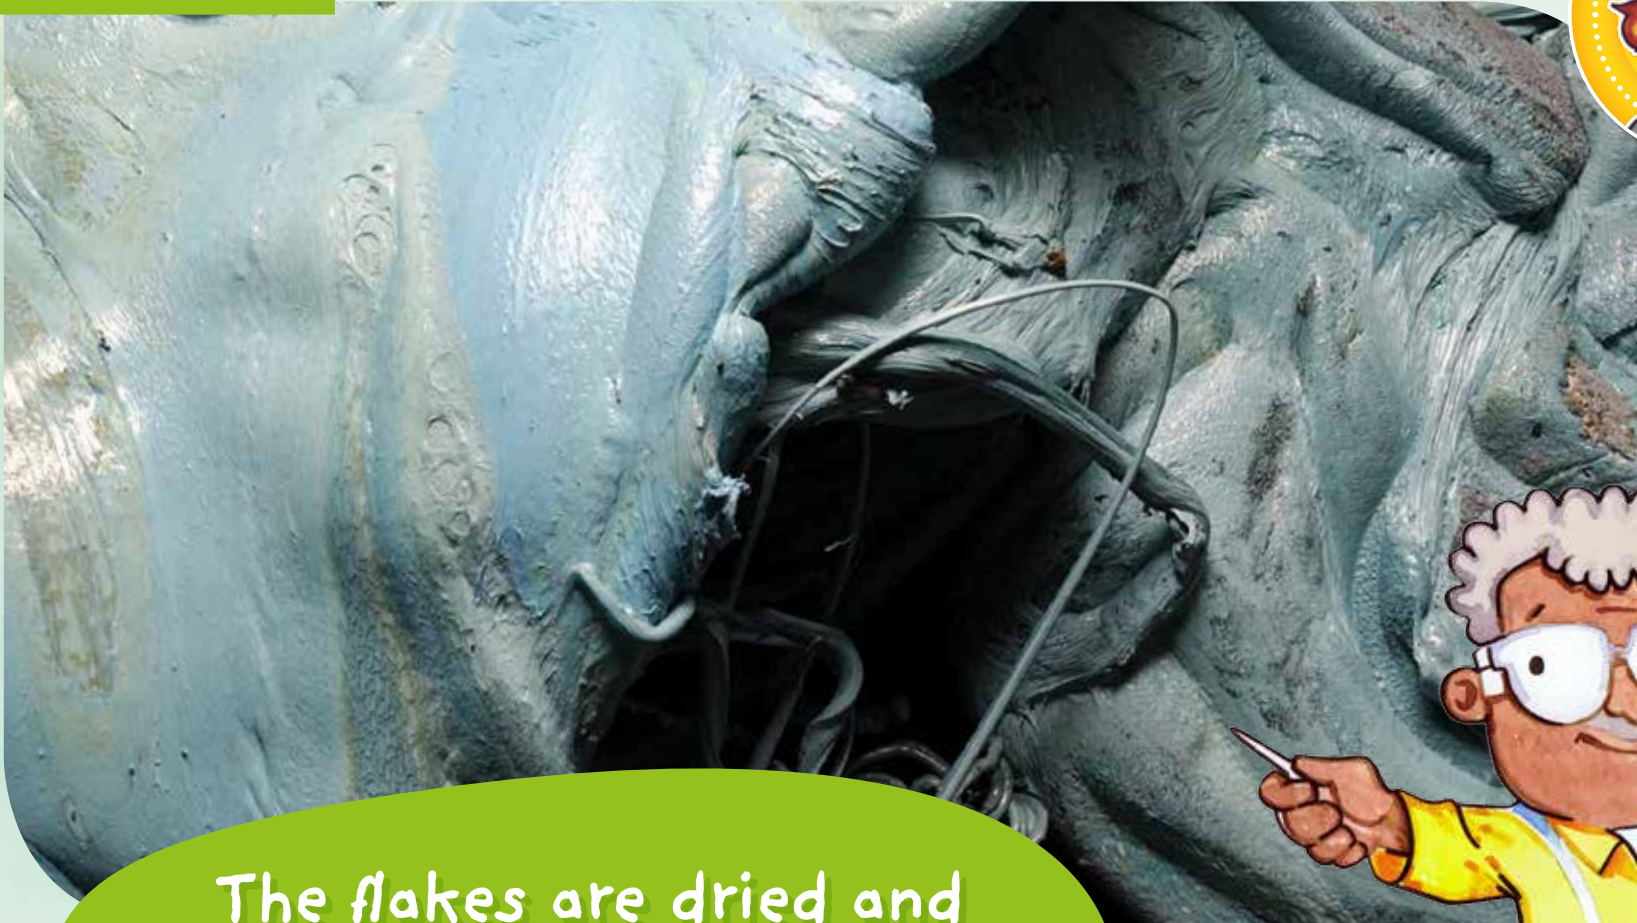

Plastic bottle

The recyclable plastic
is washed and chopped
into tiny flakes.

Plastic bottle

The flakes are dried and then melted in big machines. The melted plastic comes out in long pieces.

Plastic bottle

The strands are cooled down and cut into pellets. The pellets are then ready to make new things!

Plastic bottle

The plastic pellets can be made into new things like a traffic cone, a picnic table or even another plastic bottle!
