### N. Contaminated Land Check – Site History Questionnaire

Veolia Water Projects Ltd need to assess whether there is a risk of contaminants in the ground permeating through any proposed water pipes, as this in turn could result in contamination of the drinking water supply. This form is designed to enable us to assess that risk. Where contamination does exist, Veolia Water Projects Ltd will specify the use of barrier pipe made of a high specification material. Any private pipework will also need to be of a similar specification.

Have you commissioned a soils analysis, which includes a contamination report?

☐

Yes

☐

No

If 'Yes', you do not need to complete Sections '1' and '2' provided you attach the following:

A copy of the contamination test data showing details of contamination concentrations (a general summary will not be sufficient)

A plan showing the position where each core sample was taken.

Please note, the Water Industry require samples to be taken to a depth of 1m and will be analysing the results in accordance with threshold levels recommended by WRAS. The WRAS threshold table found in their Guidance Notes No. 9-04-03, can be viewed via the following link: [www.wras.co.uk](http://www.wras.co.uk)
