

YOUR WATER WELCOME TO YOUR NEW HOME

Veolia Water Projects Limited is your water and wastewater service provider.

HOW TO FLUSH YOUR PLUMBING:

Flush the plumbing by running the cold water tap at the end of each branch or run of pipe that serves drinking water taps for 5 minutes.

You will only need to do this once to get the water flowing around the house, although it is recommended to flush the plumbing at regular intervals, for example after holidays.

To ensure the best quality drinking water, we suggest flushing your plumbing before use.
