

Carbon Reduction Plan: PPN 006

Carbon Reduction Plan: PPN 006

Supplier name: Veolia UK Limited

Publication date: 30 June 2026

This Carbon Reduction Plan captures the activities of Veolia UK Limited and its UK subsidiaries.

Commitment to achieving Net Zero

Veolia UK Limited and its UK subsidiaries are committed to achieving net zero by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that serve as a reference point against which emissions reduction can be measured.

Baseline Year 2021

Baseline Year: 1 January 2021 - 31 December 2021	
<p>Additional Details relating to the Baseline Emissions calculations</p> <p>Greenhouse Gas (“GHG”) emissions outlined within this Carbon Reduction Plan (“CRP”) are calculated in accordance with the GHG Protocol Corporate Accounting & Reporting Standard and the Corporate Value Chain (Scope 3) Standard. All GHGs are reported in tonnes of carbon dioxide equivalent (tCO2e) to account for all seven of the Kyoto Protocol’s GHGs.</p> <p>Our Scope 1, 2 and 3 emissions data is accounted for and reported based on the operational control approach. Operational control is held where we have full authority to introduce and implement our operating policies.</p> <p>Scope 2 emissions are presented in both location and market-based methods, with the latter to reflect renewable electricity purchases.</p> <p>In addition to the five Scope 3 categories required to be reported within this CRP, we have also elected to report the following Scope 3 categories as they are material sources of emissions: Scope 3.8 (Upstream Leased Assets) and Scope 3.11 (Use of Sold Products).</p>	
Emissions	Total (tCO2e)
Scope 1	558,842
Scope 2 (Location-based)	13,564
Scope 2 (Market-based)	46
Scope 3 <i>(Business travel, employee commuting, waste generated in operations, upstream transportation and distribution, downstream transportation and distribution, upstream leased assets and use of sold products).</i>	1,273,407
Total *using location-based scope 2.	1,845,813

Breakdown of the 2021 Baseline Emissions for relevant bidding entities within Veolia UK Limited.

Baseline Year: 1 January 2021 - 31 December 2021			
Bidding Entity	Veolia ES (UK) Ltd	Veolia Energy & Utility Services UK Ltd	Veolia Water Outsourcing Ltd
Emissions	Total (tCO ₂ e)		
Scope 1	143,632	0	0
Scope 2 (Location-based)	6,290	0	0
Scope 2 (Market-based)	46	0	0
Scope 3	66,617	189,579	33,506
(Included Scope 3 categories)	(Business travel, employee commuting, waste generated in operations, upstream transportation and distribution, downstream transportation and distribution, upstream leased assets).	(Use of sold products).	(Use of sold products).
Total *using location-based scope 2.	216,538	189,579	33,506

Current Emissions Reporting

Reporting Year: 1 January 2025 - 31 December 2025	
	Reporting Year (2025)
Emissions	Total (tCO ₂ e)
Scope 1	516,446
Scope 2 (Location-based)	12,418
Scope 2 (Market-based)	73
Scope 3 (Business travel, employee commuting, waste generated in operations, upstream transportation and distribution, downstream transportation and distribution, upstream leased assets and use of sold products).	1,219,554
Total *using location-based scope 2.	1,748,418

Breakdown of 2025 Reporting Year Emissions for relevant bidding entities within Veolia UK Limited.

Reporting Year: 1 January 2025 - 31 December 2025			
Bidding Entity	Veolia ES (UK) Ltd	Veolia Energy & Utility Services UK Ltd	Veolia Water Outsourcing Ltd
Emissions	Total (tCO₂e)		
Scope 1	154,779	0	0
Scope 2 (Location-based)	5,900	0	0
Scope 2 (Market-based)	73	0	0
Scope 3	68,763	135,285	35,225
<i>(Included Scope 3 categories)</i>	<i>(Business travel, employee commuting, waste generated in operations, upstream transportation and distribution, downstream transportation and distribution, upstream leased assets).</i>	<i>(Use of sold products).</i>	<i>(Use of sold products).</i>
Total *using location-based scope 2.	229,442	135,285	35,225

Emissions reduction targets

Veolia UK and its UK subsidiaries are committed to achieving Net Zero by 2050.

Our Net Zero Roadmap is underpinned by the following six commitments:

- Commitment #1: Reduce our operational emissions;
- Commitment #2: Reduce our process emissions;
- Commitment #3: Capture and offset our remaining GHG emissions;
- Commitment #4: Work in partnership to reduce the emissions we do not have control over;
- Commitment #5: Improve the quality of our carbon reporting;
- Commitment #6: Continue to develop low and zero carbon solutions for our customers.

We estimate that our carbon emissions will decrease by:

- 2030: a reduction of 9%
- 2030 - 2040: a reduction of 51%
- 2050: a reduction of 40%

Carbon Reduction Achievements

Energy Efficiency and Consumption

- 8% reduction in Scope 1 and 2 emissions compared to 2021.
- 5% reduction in Scope 1, 2 and 3 emissions compared to 2021.
- 8% reduction in total fuel, gas, and electricity consumption since 2021.
- Produced 2,031,716 MWh of renewable and recovered energy in 2025.
- 100% of the electricity Veolia directly procures from the grid is backed by REGO certificates *(New sites are included in the dataset above and these are planned to be transitioned onto REGO backed supply).*

- 91% methane capture rate at landfills in 2025, resulting in 307,480 MWh of electricity exported to the grid. We also deployed advanced Light Detection and Ranging (LiDAR) technology to conduct surveys across landfill sites to pinpoint areas of fugitive methane emissions to support improvements on sites.
- 70 energy efficiency measures were completed or implemented in 2025 across 60 sites, this included:
 - Improvements at 20 facilities, encompassing building management system upgrades, such as LED and sensor installations, as well as heat pump installations.
 - Five sites installed solar PV installations to drive greater self-supply of renewable energy.
 - 228 electricity sub-meters installed across 37 sites to improve monitoring of electricity consumption and support energy efficiency improvements.

Fleet Decarbonisation

- 15% reduction in carbon intensity per tonne of waste collected from 2024 to 2025, resulting in a 9% reduction compared to 2021.
- Across operations and services a total of 141 more electric vehicles were introduced in 2025, taking the total to 857 electric vehicles across our operations and services.
- HVO usage increased by 60% in 2025 compared to 2022, when HVO was first introduced.
- Veolia continues to facilitate the adoption of low-carbon travel options via the Cycle to Work scheme, adoption of hybrid and electric vehicles for company cars and displaying the estimated carbon impact of travel options in the business travel booking platform to encourage lower carbon choices.

Procurement and Supply Chain

- Veolia's Sustainable Procurement roadmap (2023-27) integrates ESG performance into our procurement process and is supported by our supplier management system that provides enhanced reporting and analysis on supplier performance.
- We continue to refine and improve GHG data collection via engagement with our supply chain. Supplier engagement focuses on targeted initiatives to encourage suppliers to report and share emissions data, and deploy training sessions.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the Veolia UK Executive Committee, the senior management body in Veolia UK.

Signed on behalf of the Supplier:

Valerie Clavie
